

Use this kit to replace the well cap on your Rugged Buoy.

Contents

- Well cap (with 4 pre-installed Phillips screws)
- Cap nuts and bolts (4)

Tools & Supplies (Not Included)

- 3/4" wrench
- Phillips head screwdriver (for marine light)

Installing Replacement Well Cap

If a VuLink antenna is attached to your well cap, you may need to buy a replacement antenna.

1 Remove instruments and cap.

Remove instruments from the well.

Unscrew marine light from cap (if installed).

Remove the 4 bolts from the sides of the cap.

Remove cap from instrument well.

2 Install new cap.

Slide on new cap. Align bolt holes with well holes.

Secure the 4 bolts around the sides of the cap.

Reinstall marine light (if using).

Hang VuLink or backshell inside cap.

Use only the hardware provided. Never use steel bolts because they can cause galvanic corrosion.
